Professional Summary

Healthcare Informatics professional with a Doctor of Pharmacy background and a Master's degree in Healthcare Informatics, experienced in cleaning, validating, analyzing, and reporting clinical and research data. Proficient in SQL, Python, SAS, Power BI, Tableau, and Excel, with strengths in data quality, visualization, clinical safety, confidential information management, and regulatory documentation. Brings healthcare research and clinical experience with strong analytical and communication skills.

Technical Skills

- **Reporting & Visualization:** Power BI, Tableau, Excel, Power Query
- **Data Management:** Data Extraction, Data Cleaning, Data Validation, Data Quality, Database Management, Reporting
- **Healthcare & Safety:** Clinical Safety, Patient Safety, Adverse Drug Reactions, Healthcare Quality, Clinical Data, Risk Analysis, Safety Reporting, ICD-10, CPT
- **Regulatory & Compliance:** OSHA 10-Hour Certification, Good Clinical Practice (GCP), Institutional Review Board (IRB), Clinical Trial Management Systems (CTMS), CDISC Standards, FDA Submission Support, Pinnacle 21, HIPAA Compliance
- **Microsoft Office:** Excel, PowerPoint, Word, Outlook
- **Programming & Query Languages:** Python, SQL, R

PROFESSIONAL EXPERIENCE

University of Wisconsin–Milwaukee

Dec 2024 - Present

Clinical Research Assistant

Milwaukee, WI

- Supported federally funded NIMH R01, BADER, and MyHESTIA research projects focused on Alzheimer's disease, dementia, aging populations, and remote caregiving.
- Support the collection, organization, cleaning, validation, and analysis of clinical research data using SQL, Python, SAS, Power BI, and Tableau.
- Analyze quantitative and qualitative information to identify trends, inconsistencies, potential risks, and areas requiring additional investigation.
- Maintain accurate and confidential research documentation and participant information in accordance with established protocols, HIPAA compliance requirements, and research standards.
- Manage Institutional Review Board (IRB) applications and amendments, supporting compliance with research and ethical requirements.
- Worked within a Clinical Trial Management System (CTMS) environment while following Good Clinical Practice (GCP) guidelines.
- Collaborate with faculty, clinicians, researchers, and data teams to implement research protocols, resolve data-related issues, and address project requirements.
- Prepare reports, analytical summaries, Power BI and Tableau visualizations, presentations, and supporting documentation for multidisciplinary stakeholders.
- Prioritized multiple research activities, documentation requirements, data-analysis tasks, and project deadlines in a time-sensitive environment.

CLINOTICA

Sep 2022 - May 2023

Clinical SAS Associate

Hyderabad, India

- Performed clinical data manipulation, reporting, validation, and analysis using SAS, PROC SQL, SAS procedures, functions, macros, and ODS.
- Supported Integrated Safety Summaries (ISS) and Integrated Efficacy Summaries (ISE) activities involving clinical safety and efficacy data.
- Created and reviewed annotated CRFs and clinical datasets using CDISC standards to support regulatory compliance and data consistency.
- Developed submission-ready datasets and standardized clinical data presentations for regulatory submission activities.
- Planned and developed SAS programs for electronic submission deliverables and performed validation using Pinnacle 21.
- Produced standardized reports using SAS/ODS in HTML, PDF, and RTF formats and converted datasets into XPT format for FDA submission.
- Coordinated internal quality-control activities while maintaining project timelines and delivery requirements.
- Maintained strong attention to detail when handling regulated clinical information, safety data, and confidential documentation.

KIMS Hospitals

May 2022 - Jul 2022

Resident Doctor

Hyderabad, India

- Participated in daily clinical rounds within Gynecology, Nephrology, and General Medicine.
- Provided immediate first-aid support to patients during medical emergencies, following established hospital protocols and safety procedures.

- Recognized and responded promptly to patient emergencies, supporting initial assessment, stabilization, and escalation to appropriate medical personnel.
- Reviewed patient information, laboratory results, medications, and treatment plans to support safe and appropriate patient care.
- Identified medication-related risks and recommended drug-regimen adjustments for patients with complex and multidrug-resistant infections.
- Optimized medication dosing for patients with impaired renal or hepatic function using clinical and laboratory information.
- Collaborated with physicians and healthcare professionals to support patient safety and clinical decision-making.
- Maintained confidentiality and accuracy while handling sensitive patient and clinical information.

EDUCATION

University of Wisconsin–Milwaukee <i>Master's, Healthcare Informatics</i> • GPA: 4.0/4.0	Aug 2024 - Dec 2025
Jawaharlal Nehru Technological University Ananthapur <i>Doctor of Pharmacy (Pharm.D.)</i> • Achievements: Percentage: 83	Aug 2016 - Jul 2022

Certifications

- OSHA 10-Hour Certification
- Occupational Safety and Health: Fire and Emergency Preparedness
- Work Safe, Go Home Safe on Production Shifts
- Microsoft Power BI Certification
- Excel for Healthcare
- SAS Certification
